

SA'ED AYMAN

Jordan - Zarqa | +962797110803 | sa467563@gmail.com

SUMMARY

Passionate computer engineer with a strong background in web development, I excel in self-directed learning, utilizing free resources like YouTube and official documentation. My project-based approach has sharpened my problem-solving and debugging skills. I prioritize deep understanding over certification, which has enabled me to effectively teach web development. Recognized in every job for my quick adaptability and ability to master new technologies from documentation, I thrive in dynamic environments and continuously seek practical learning opportunities.

EXPERIENCE

08/2022 to Current

Web Developer

NIXPEND COMAPNY

- Successfully integrated the National Platform for Health Information Exchange System (NPHIES) APIs into our system, meeting rigorous compliance standards and obtaining the necessary certification for the company.
- Directed significant refactoring efforts to enhance the overall codebase and improve the efficiency of various modules within the application.
- Managed the seamless integration of the healthcare app with a leading enterprise resource planning system, focusing on efficient data storage and processing.
- Developed APIs for various modules within the application, fostering a cohesive and interconnected system.
- Played a pivotal role in the creation of a client-facing application, overseeing API integrations, leading successful implementations.
- Designed and developed the official website for the company, creating an engaging online presence that showcases services and products.

04/2022 to 07/2022

Web Developer

Eureka Tech Academy

- Conducted interactive web development classes for students, focusing on building a strong foundation in programming
- Instructed students on the fundamentals of web development, covering HTML, CSS, and JavaScript, and progressed to more advanced topics
- Taught version control using Git, emphasizing best practices for collaborative coding and project management
- Guided students in deploying their web applications on platforms such as GitHub, Netlify, or Heroku
- Introduced backend development using Node.js and Express, emphasizing integration with MongoDB using Mongoose and managing database clusters
- Instructed students on front-end frameworks including Angular, React, and Vue.js, providing a comprehensive understanding of modern web development
- Created and administered examinations to assess students' understanding

of the material and track their progress.

SKILLS

- Angular
 - Node js
 - Express framework
 - Bootstrap
 - Ionic
 - Rxjs
 - JavaScript
 - Postman
 - Swagger
- TypeScript
 - Socket io
 - Cloud storage Services like: S3 object storage , Google object storage , and oracle object storage
 - Linux (Ubuntu)
 - Databases: Mongodb , Mysql(MariaDb)
 - ORM tools: mongoose , prisma
 - Version Control tools like: Git , Github , gitlab , azure devops

EDUCATION

01/2022

Bachelor of Computer engineering
Hashemite university

LANGUAGES

Arabic: First Language
